# FEW TIPS TO PREVENT FROM CYBER ATTACKS

THINK BEFORE YOU CLICK

Any message, phone call or email that persuades you to reveal your passwords, social security number, credit card numbers, should be a matter of concern.
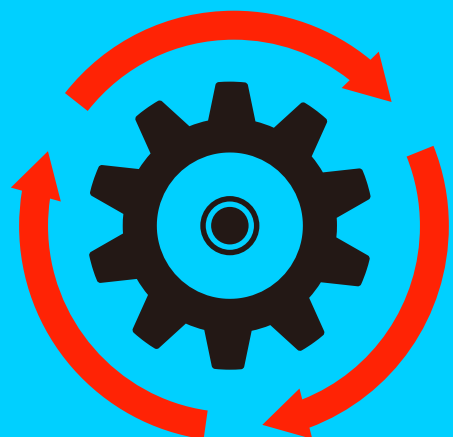

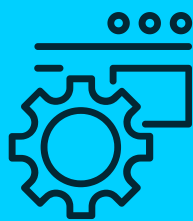

USE STRONG PASSWORDS

Make sure to use different passwords for all your apps and websites. Your master password should be strong, and you should secure your password manager account with MFA!

UPDATE YOUR SOFTWARE

Update the operating system on your mobile phones, tablets, and laptops to make sure you get their latest, most secure versions.

UPDATE.....

Wi Fi

WIFI SECURITY

Securing your wifi networks and hiding them is one of the safest things you can do for you systems. Avoid devices that can connect to your network and compromise you.
